

LARRY CANDELARIA PARBA

Senior Full-Stack Web Developer | Laravel, Vue.js, React.js, Next.js & AI Integrations
Davao City, Philippines | larry.parba@outlook.com | larryparba.com | github.com/Larzz
OPEN TO WORK - Remote Full-Time, Contract, and Freelance Opportunities

PROFESSIONAL SUMMARY

Senior full-stack web developer with 9+ years of experience building and maintaining scalable web platforms for e-commerce, enterprise, booking, marketplace, and service-based businesses. Strong expertise in Laravel, Vue.js, React.js, Next.js, REST APIs, MySQL, production infrastructure, payment integrations, and AI-enabled workflows. Proven ability to translate business requirements into secure, maintainable products, resolve complex production incidents, and communicate effectively with clients and cross-functional teams.

CORE SKILLS

Backend & APIs: PHP, Laravel, REST APIs, MVC, authentication, third-party integrations

Database: MySQL, MariaDB, schema design, query optimization, Supabase

Payments & Commerce: Stripe, Tabby, MPGS, checkout flows, vouchers, shipping integrations

Engineering: Architecture, debugging, performance optimization, security, production support

Frontend: Vue.js, React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS

Cloud & DevOps: Git, GitHub, Vercel, cPanel, DNS, email systems, deployments

AI & Automation: AI API integration, prompt engineering, workflow automation, AI-assisted development

Collaboration: Requirements analysis, client communication, mentoring, project coordination

PROFESSIONAL EXPERIENCE

Pahatud.com - Full-Stack Web Developer / Mobile API Support

Davao City, Philippines | Present

- Developing and maintaining the Pahatud web platform using Laravel and Vue.js, supporting restaurant, agent, and administration workflows.
- Built agent and restaurant onboarding features, approval workflows, dashboards, commission reporting, and email notifications.
- Supported Flutter mobile development by building Laravel REST APIs for rider login, online status, order acceptance, wallet balances, delivery summaries, and transaction logs.
- Connected mobile app features to backend services and supported API integration, testing, and troubleshooting across web and mobile workflows.

Solene.ph - Freelance Full-Stack Developer

Davao City, Philippines | May 2026 - Present

- Designing and developing a beauty-services marketplace that connects customers with makeup artists through discovery, artist profiles, availability management, and booking workflows.
- Built product requirements and system flows for customer, artist, studio-manager, and super-admin experiences, including commissions, payouts, bookings, galleries, and service management.
- Implemented and planned the web and mobile ecosystem using Next.js, Supabase, Flutter, authentication, row-level security, social login, and transactional email integrations.
- Managed domain, DNS, Vercel deployment, subdomain architecture, and production troubleshooting while continuously improving usability and conversion-oriented booking flows.

Creativo DMCC - Application Developer

Dubai, UAE | June 2019 - May 2025

- Led backend and full-stack development across enterprise, e-commerce, booking, and high-traffic client platforms using Laravel, Vue.js, React.js, and MySQL.
- Architected database schemas, REST APIs, payment integrations, and business workflows; integrated external systems including Stripe, Tabby, MPGS, DHL, and AI APIs.
- Served as the technical escalation point for production incidents, security issues, server migrations, DNS, email, SSL, and deployment problems.
- Delivered production migrations with zero data loss, improved platform performance and maintainability, and mentored junior developers through code reviews and implementation guidance.

Almani Lighting - IT Engineer / Web Developer

Dubai, UAE | August 2018 - June 2019

- Maintained and enhanced a Laravel-based e-commerce platform while providing company-wide IT support.
- Improved application performance, modularized reusable Vue.js components, and developed campaign and product-launch landing pages.
- Supported backend enhancements, third-party integrations, internal automation, hardware, software, and user troubleshooting.

Contrib - Web Developer

Philippines | January 2016 - March 2018

- Worked on large-scale PHP systems supporting the management of more than 20,000 domains.
- Built an internal lightweight PHP framework, backend modules, domain-management tools, and production-ready interfaces from UI/UX designs.
- Debugged legacy applications and improved code stability, scalability, and maintainability.

SELECTED PROJECT EXPERIENCE

- Solene.ph: Beauty-services marketplace with artist onboarding, customer booking, availability, galleries, commissions, payouts, studio management, admin tools, and mobile-app planning.
- Monili Jewellers: Laravel and Vue.js e-commerce platform with Stripe, Tabby, vouchers, wishlist, checkout, multi-currency logic, phone validation, and DHL shipping integration.
- Lanka Princess: Hotel booking and rates-management platform with room and treatment pricing imports, booking workflows, bilingual interfaces, customer/admin emails, and reporting.
- Parc Ferme Payment: Laravel payment application migrated from MiGS to Mastercard Payment Gateway Services, including API integration and 3-D Secure troubleshooting.
- Pretty Faces Atlanta: Booking-integration and data-migration support across Wix, Boulevard, and Nextech, including privacy-policy and operational workflow requirements.
- Additional Platforms: KMK Perfumes, Transgulf, Eurostar Rental, Mercato Shopping Mall, Soporella, Shop Mesco, Mowasalat, EvolveBeyond, and Vijit Pillai Art.

EDUCATION

Bachelor of Science in Information Technology - Holy Cross of Davao College, 2015
